

# MacDon Australia has Moved to a New Office

*Submitted by Judith Shaw*

It was 7 years ago that the MacDon Australia office took shape at Suite 8, 83A Main Street, Greensborough, just outside of Melbourne. At that time, we had a cozy, three-roomed office with a reception area, an office for Judith Shaw and a larger office for Brian Kirchhofer that also incorporated the boardroom; with a total area of 55 square meters. This was adequate for the staff of two at that time. As MDA grew, more people were needed to maintain the sales, service and administration of the company. Our Product Support Manager, Paul Pickford, was appointed in 2001 and Kristen Pickup also joined our team in September 2005 as the Office Assistant. After the 30th Anniversary celebrations in Australia took place in March last year, it was time for MDA to look at finding larger and more modern premises.

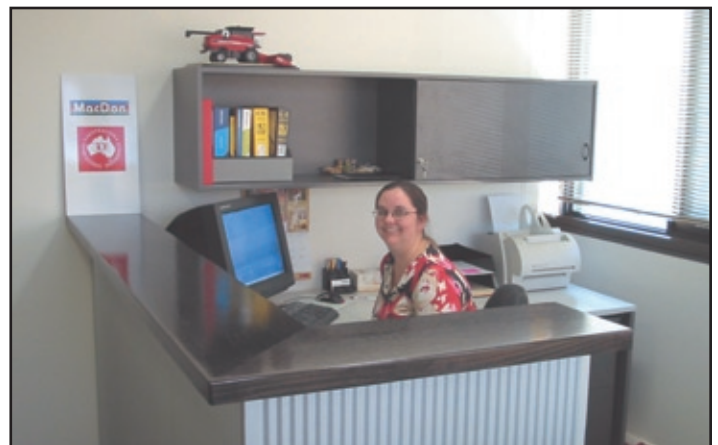

In April 2006, we moved into modern and spacious premises at Suite 3, 143 Main Street. The new office is approximately

300 meters from our first office space and has a floor space of approximately 150 square meters. We are now located at the edge of the business area of Greensborough and occupy the top floor which overlooks parklands, tennis courts and a football/cricket oval.

Renovations were made to the reception and meeting areas in the new building; we tried to keep a rural type theme with post and wire at the top of the stairs and corrugated iron and wood on the reception desk. With more space at the new office, we are planning to run some training sessions for dealers in the future. We are all very happy in our new home and we think you will agree that it is a great facility.
